CAREER OBJECTIVE

Full Stack Software Engineer focused on building secure, scalable, and maintainable enterprise applications in the healthcare domain. Experienced in delivering production-grade features using React.js and Java while ensuring performance, code quality, and system reliability.

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 1.5+ years of experience working on a large-scale US healthcare order and patient management platform. Strong expertise in React.js, Java 17, Spring Boot, RESTful APIs, database design, security, and third-party integrations. Proven ability to handle complex business logic, critical production issues, and high-quality delivery in Agile environments.

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer – Techforce Infotech Pvt. Ltd. August 2024 – Present | Healthcare Domain

• Developing and maintaining an enterprise-grade healthcare order management system supporting patients, practices, manufacturers, agencies, and administrators.
• Building scalable frontend modules using React.js, Redux Toolkit, and TypeScript, focusing on usability and performance.
• Designing and implementing 40+ RESTful APIs using Java 17 and Spring Boot to handle orders, invoices, payments, documents, and notifications.
• Implementing JWT-based authentication, role-based access control, and permission-driven workflows.
• Integrating third-party services including payment gateways, email, SMS, ERP systems, and tracking APIs.
• Developing template-based PDF generation for orders, invoices, and reports using Apache PDFBox and POI.
• Performing SonarQube-based quality checks and resolving critical production issues with minimal downtime.
• Working across Dev, Stage, and Production environments deployed on AWS infrastructure.

Software Developer Intern – Rays TechServ February 2024 – May 2024 | Ahmedabad

• Assisted in backend and frontend development tasks, debugging issues, and enhancing application features.
• Gained exposure to real-world SDLC practices, version control, and CI/CD workflows.

KEY ACHIEVEMENTS

• Awarded **Team Motivator Award** for driving collaboration, ownership, and delivery excellence.
• Ensured high code quality through static analysis and quality gates using SonarQube.
• Resolved critical production bugs under tight timelines, maintaining system stability and client trust.

KEY PROJECT EXPERIENCE

Enterprise Healthcare Order Management Platform

- Designed and implemented complex order workflows, dynamic pricing, invoicing, and commission logic.
- Built secure patient data handling and audit logging aligned with healthcare compliance standards.
- Implemented asynchronous processing, schedulers, and distributed job locking for reliability.
- Enabled real-time notifications using WebSocket and event-driven architecture.

OTHER PROJECTS

Lab Automation Tool – API integration, MySQL persistence, Angular 17 UI with PrimeNG.
First Flight Travels – Travel booking platform with authentication and session management.

TECHNICAL SKILLS

Frontend: React.js, Redux Toolkit, JavaScript, TypeScript, HTML5, CSS3
Backend: Java 17, Spring Boot, Spring Security, REST APIs
Database: MySQL, JPA/Hibernate, SQL
Integrations: Payment Gateway, Email, SMS, ERP, Webhooks
Tools & Platforms: Git, SVN, Maven, CI/CD, AWS, SonarQube
Practices: Agile/Scrum, Secure Coding, Clean Architecture

EDUCATION

B.E. – Computer Engineering
Vishwakarma Government Engineering College, Ahmedabad 2020 – 2024
Gujarat Technological University (GTU)

ADDITIONAL INFORMATION

- Languages: English, Hindi, Gujarati
- Experience working in healthcare domain projects with high data sensitivity.
- Strong ownership mindset, adaptability, and continuous learning approach.
- Currently preparing for the AWS Developer Associate Certification.
