Professional Summary

Java Backend Engineer with 2+ years of experience building and scaling Spring Boot microservices on AWS for healthcare and recruitment platforms, with full-stack experience in React.js. Experienced in REST API design, PostgreSQL/MySQL query tuning and Redis caching, Kafka-based asynchronous processing, payment and ERP integrations, and multi-source data pipelines, with a focus on performance and production reliability.

Technical Skills

Languages: Java 17/21, SQL, Python, TypeScript, JavaScript (ES6+), HTML5, CSS3
Backend & Frameworks: Spring Boot, Spring Security, Spring Data JPA, Spring MVC, Hibernate, REST APIs, Microservices, JWT, RBAC, OpenAPI/Swagger
Databases & Caching: PostgreSQL, MySQL, Redis, Flyway, Query Optimization, Indexing
Messaging & Async: Apache Kafka, Event-Driven Architecture, WebSocket, Quartz Scheduler, Asynchronous Processing, Distributed Job Locking
Cloud & DevOps: AWS (EC2, S3, Lambda, RDS), Docker, Jenkins, GitHub Actions, CI/CD, Maven, Linux, Git, SVN
Frontend: React.js, Redux Toolkit, TanStack Query
Testing & Quality: JUnit, Mockito, pytest, Unit Testing, Postman, SonarQube
Automation & Integrations: Playwright, Web Scraping, Stripe, ERP, Email/SMS APIs, Webhooks, Apache PDFBox, Apache POI, LLM APIs
Practices: OOP, Data Structures & Algorithms, Design Patterns, System Design, Agile/Scrum, SDLC, Code Review, Performance Tuning

Professional Experience

Techforce Infotech Pvt. Ltd., Ahmedabad, India — Aug 2024 -- Present
Software Engineer L1 — *Jan 2026 -- Present*
Associate Software Engineer — *Aug 2024 -- Dec 2025*

Project: Enterprise Healthcare Order & Patient Management Platform | *Java 17, Spring Boot, Kafka, AWS*

- Designed and maintained 40+ REST APIs for orders, invoices, payments, dynamic pricing, commissions, and audit logging, serving 100+ practices, agencies, manufacturers, and administrators and processing 10,000+ orders and invoices.
- Secured workflows with JWT authentication and role-based access control in Spring Security, protecting patient data.
- Built Kafka-based microservices for real-time data processing and asynchronous background jobs with distributed locking to prevent duplicate runs across instances.
- Integrated Stripe payments with Quartz-scheduled automation, cutting manual processing by 40%, and connected ERP systems, email/SMS providers, tracking services, and webhooks.
- Delivered real-time notifications over WebSocket and automated PDF and Excel generation for invoices and reports using Apache PDFBox and Apache POI.
- Built LLM-powered completeness checks for electronic health record (EHR) documents, automating patient record validation.
- Built reusable React.js, TypeScript, and Redux Toolkit components, improving frontend maintainability and feature delivery speed.
- Managed AWS infrastructure (EC2, S3, Lambda, RDS) at 99.9% uptime with CI/CD pipelines in Jenkins and GitHub Actions; supported migration from SVN to Git/GitHub.
- Resolved production-critical issues across Dev, Stage, and Production environments and improved code quality through SonarQube analysis and peer code review.

Project: KabilHire -- Recruitment Platform | *Java 21, Spring Boot 4, PostgreSQL, Redis, React 19*

- Reworked applicant tracking (ATS) pipeline, candidate search, and job search queries: replaced per-applicant interview lookups (N+1) with one batched JOIN FETCH query, moved pagination to keyset cursors, cached result counts per filter combination to skip repeated COUNT(*) scans, and added composite indexes.
- Cut API requests by 64% (121 to 44) and payload by 60% (541 KB to 216 KB) across 15 user journeys, measured with a custom Playwright harness, by removing redundant polling and refetches, deduplicating TanStack Query requests, and trimming oversized payloads.

- Cached reference data and candidate profile views in Redis with event-driven eviction, keeping search results consistent as job and profile states change.
- Fixed production stability issues by bounding Kafka client timeouts so an unreachable broker could not stall the application, and capping an unbounded notification fetch that failed with HTTP/2 protocol errors.

Project: Job Scraper -- Multi-Source Job Aggregation Engine | *Python, Playwright, Spring Boot, PostgreSQL*

- Built the engine end-to-end in under four weeks: Indeed and LinkedIn collectors plus a Playwright browser collector for Naukri, with freshness and quality gates and four-layer deduplication before ingestion into KabilHire.
- Integrated it with Spring Boot through a database-driven cron scheduler that runs it as a child process, an API-key-secured ingestion endpoint, and a permission-gated Super Admin review-and-publish console.
- Made runs resilient by stopping a hung page from stalling an entire run and adding crash-safe Playwright teardown; wrote the knowledge-transfer guide and EC2 deployment runbook.

Rays TechServ Feb 2024 -- May 2024
Software Development Intern

- Built responsive web applications using Java, Spring Boot, and React.js for client projects.
- Developed RESTful APIs, improving data retrieval efficiency by 25%.

CodSoft Jul 2023 -- Aug 2023
Web Development Intern

- Developed responsive web interfaces using HTML5, CSS3, JavaScript, and React.js.

Projects

Skillroom -- Prompt Intelligence Engine | *GitHub*

- Open-source Claude Agent Skill (MIT license) that transforms brief prompts into expert-level prompts using intent classification and a transparent quality scorecard.

Lab Automation Tool | *Angular 17, MySQL*

- Developed REST API integrations, a MySQL persistence layer, and an Angular 17 frontend with PrimeNG components for laboratory operations.

First Flight Travels

- Implemented authentication and booking management functionality for a travel platform.

Education

Vishwakarma Government Engineering College, Ahmedabad 2020 -- 2024
Bachelor of Engineering (B.E.) in Computer Engineering *Gujarat Technological University (GTU)*

Certifications

Java Foundations Professional Certificate -- JetBrains (2026)
Model Context Protocol: Advanced Topics -- Anthropic (2026)
Claude Code in Action -- Anthropic (2026)
Building AI Agents: Advanced Techniques for Developers -- LinkedIn Learning (2026)
AWS Certified Developer -- Associate (In Progress)

Achievements & Additional Information

Recipient of the Team Motivator Award for collaboration, ownership, and delivery excellence.
Languages: English, Hindi, Gujarati.
